

What Do We Need to But Not Know About International Migration & Welfare?

Jean-Michel Lafleur
Université de Liège

Siloization of research on migration & welfare

Blind spots in the study of migration and Welfare States

- *Conceptual level*: Immigration-emigration nexus
- *Policy level*: connections between migration policy and welfare policy reforms
- *Individual level*: Articulation between formal and informal welfare practices

Ways forward

- **Reconceptualizing** & updating theories on the link between migration and welfare
- **Innovating** with methods while placing ethical concerns at the centre
- **Committing** to interdisciplinarity
